

Follow-up report 3

04/08/2021

The event is ongoing. Weekly follow-up reports will be submitted.

Sender	Country/territory	Report ID
Delegate of Lithuania	Lithuania	FUR_151000
Event status	No evolution reason	Self-declaration
On-going	No new information available since the last report	No

General information

Country or zone - Country	Disease - SARS-CoV-2 in animals (Inf. with)	Started on - 26/11/2020
Animal type - Terrestrial	Confirmed on - 26/11/2020	Causal agent - SARS-CoV-2
Disease category - Emerging	Reported on - 04/08/2021	Reason - Emerging disease

Disease impact

Outbreak morbidity - 0.02	Outbreak mortality - 0.02
Zoonotic potential - No	

Epidemiology

Source of the event or origin of the infection

- Contact with infected worker
- Unknown or inconclusive

Control measures at event level

Domestic control measures

Applied

- Selective killing and disposal
- Quarantine
- Movement control inside the country
- Disinfection
- Official disposal of carcasses, by-products and waste

Wild control measures

Diagnostic

Clinical signs - Yes

Method of diagnostic - Diagnostic test

Test name	Category	Test type	Laboratory	Species sampled	Outbreaks	Tested from	Tested until
Polymerase chain reaction (PCR)	Nucleic acid detection	Laboratory Test	National Food and Veterinary Risk Assessment Institute (NFVRAI) National Laboratory	Mustelidae/American Mink	4	26/11/2020	31/03/2021

Quantitative data summary

Measuring unit - Animal

Species	Type	Susceptible	Cases	Deaths	Killed and disposed of	Slaughtered	Vaccinated	Outbreak morbidity	Outbreak mortality

All species	Total	134533	336	338	-	-	0	0.25	0.25

Event morbidity - 0.02

Event mortality - 0.02

Morbidity range - 0.03-0.04

Mortality range - 0.04-0.05

Outbreaks

1000140189-Jonava

Outbreak reference - 1

Started on - 26/11/2020

First administrative division - Kauno

Second administrative division - Jonavos

Epidemiological unit - Farm

Geographic coordinates -

55.06028546,24.24318483

Location - Jonava

Description of the affected populationThe minks were bred for their fur in a farm. Evidence of contamination was established within the framework of passive surveillance due to increased mortality. 169 minks were found dead and randomly 10 were sampled and tested by PCR and were positive to SARS-CoV2. Next day out of 155 found dead 22 were sampled and all tested positive to SARS-CoV2 by PCR. In total 5 farm workers were detected positive to COVID-19.

Species	Type	Measuring unit	Susceptible	Cases	Deaths	Killed and disposed of	Slaughtered	Vaccinated

Control measures different from event level

Additional measures

- Disinfection
- Movement control inside the country
- Quarantine
- Selective killing and disposal

Outbreak name	Test	Result	Result date
1000140189-Jonava	Polymerase chain reaction (PCR)	Positive	26/11/2020

1000142361-Pavartyciu

Outbreak reference - 2

Started on - 30/12/2020

First administrative division - Šiauliai

Second administrative division -
Radviliškio

Epidemiological unit - Farm

Geographic coordinates -
55.776586,23.735158

Location - Pavartyciu

Description of the affected population In the framework of passive surveillance and due to the COVID-19 detection for five workers, five dead minks were sampled and SARS-CoV-2 virus was detected in four minks.

Species	Type	Measuring unit	Susceptible	Cases	Deaths	Killed and disposed of	Slaughtered	Vaccinated
