Event status	Self-declaration	
Resolved	No	

General information

Country or zone - Country	Disease - SARS-CoV-2 in animals (Inf. with)	Started on - 04/02/2022
Animal type - Terrestrial	Confirmed on - 04/02/2022	Causal agent - SARS-CoV-2
Ended on - 14/02/2022	Disease category - Emerging	Reported on - 22/02/2022
Reason - Emerging disease		

Disease impact

Outbreak morbidity - 40.0	Outbreak mortality - 0.0
Zoonotic potential - Yes	Zoonotic potential description - Zoonotic potential under investigation.

Epidemiology

Source of the event or origin of the infection - Likely human to animal transmission

Epidemiological comments Cats from the same household as a close contact of a confirmed human case of COVID-19 were placed under quarantine on 4 February 2022. Following veterinary examination, samples were taken after the cats' admission to the quarantine facility. The cats have not exhibited any specific clinical signs.

Risk management measures are in place for this case, including cleansing and disinfection of the premises, proper personal hygiene and protection. Upon subsequent satisfactory testing results, the cats were released from the quarantine facility on 14 February 2022.

Mammalian pets from household with confirmed human cases or close contacts of such cases will be collected for testing of SARS-CoV-2 as appropriate.

Control measures at event level

Domestic control measures

Applied

- Disinfection
- Quarantine
- Traceability
- Screening

Wild control measures

Diagnostic

Clinical signs - No

Method of diagnostic - Diagnostic test

Test name	Category	Test type	Laboratory	Species sampled	Outbreaks	Tested from	Tested until	Result
Real-time reverse transcription	Nucleic acid detection	Laboratory Test	Tai Lung Veterinary Laboratory,	Cats	1	04/02/2022		Positive
