

Follow-up report 1

07/05/2021

The event is ongoing. Weekly follow-up reports will be submitted.

Sender	Country/territory	Report ID
Delegate of Latvia	Latvia	FUR_149834
Event status	No evolution reason	Self-declaration
On-going	No new information available since the last report	No

General information

Country or zone - Country	Disease - SARS-CoV-2 in animals (Inf. with)	Started on - 09/04/2021
Animal type - Terrestrial	Confirmed on - 10/04/2021	Causal agent - SARS-CoV-2
Disease category - Emerging	Reported on - 07/05/2021	Reason - Emerging disease

Disease impact

Outbreak morbidity - 0.01	Outbreak mortality - 0.01
Zoonotic potential - Yes	Zoonotic potential description - Most likely the disease introduction happened through the infected workers.

Epidemiology

- Source of the event or origin of the infection
- Unknown or inconclusive
 - most likely the disease introduction happened through the infected workers

Epidemiological comments No clinical signs of COVID-19 observed in minks. Epidemiological inquiry is on-going.

Note: This immediate notification was received on 16th April 2021 and published on the same day. due to a technical issue, the report had to be reentered and republished on 30th april 2021.

Control measures at event level

Domestic control measures

- Applied
- Movement control inside the country
 - Screening
 - Disinfection

Wild control measures

Diagnostic

Clinical signs - Yes

Method of diagnostic - Diagnostic test

Test name	Category	Test type	Laboratory	Species sampled	Outbreaks	Tested from	Tested until	Result
Real-time reverse transcription polymerase chain reaction (rRT-PCR)	Nucleic acid detection	Laboratory Test	Institute of Food Safety, Animal Health and Environment, BIOR National Laboratory	Mustelidae	1	10/04/2021		Positive

Quantitative data summary

Measuring unit - Animal
