

## Follow-up report 30

19/01/2022

**The event is ongoing. Weekly follow-up reports will be submitted.**

Sender	Country/territory	Report ID
Delegate of United States of America	United States of America	FUR_153469
Event status	Self-declaration	
On-going	No	

### General information

Country or zone - Country	Disease - SARS-CoV-2 in animals (Inf. with)	Started on - 22/10/2020
Animal type - Terrestrial	Confirmed on - 13/04/2021	Causal agent - SARS-CoV-2
Disease category - Emerging	Reported on - 19/01/2022	Reason - Emerging disease

### Disease impact

Outbreak morbidity - 2.0	Outbreak mortality - 1.0
Zoonotic potential - Yes	Zoonotic potential description - Zoonotic potential under investigation

### Epidemiology

Source of the event or origin of the infection - Suspected human transmission

Epidemiological comments-- Update 14 January 2022

Nevada (NV) - A domestic cat from a known positive COVID-19 household was confirmed positive for SARS-CoV-2 at the National Veterinary Services Laboratories based upon molecular testing (PCR and sequencing). The cat showed clinical signs of lethargy, sneezing, nasal discharge and general malaise. This cat also tested positive for Bordetella at a private laboratory. Control measures were discussed with the owner including isolation, cleaning and disinfection. The cat has recovered. This represents a new state with detection of a positive SARS-CoV-2 animal, but not a new species for the U.S.

There is a single SARS-CoV-2 event occurrence in the United States of America, however, for WAHIS technical reasons, any new outbreaks in the country will be reported in this new event and not in the one first reported in April 2020.

For more details about SARS-CoV-2 testing of animals in the United States, see:  
<https://www.aphis.usda.gov/aphis/dashboards/tableau/sars-dash-board>.

### Diagnostic

Clinical signs - Yes

Method of diagnostic - Diagnostic test

Test name	Category	Test type	Laboratory	Species sampled	Outbreaks	Tested from	Tested until	Result
Virus neutralisation test	Immunological methods for antigen or protein detection	Laboratory Test	National Veterinary Services Laboratories (NVSL), Ames, Iowa National Laboratory	Cats/Dogs	8	06/05/2021	10/05/2021	Positive
Gene sequencing	Genotyping	Laboratory Test	National Veterinary Services Laboratories (NVSL), Ames, Iowa	Cats/Canadian lynx/Tiger/Spotted Hyena/Snow Leopard/Dogs/South American Coati/Lion/White-Tailed deer/Binturong/Mustelidae/Asian small-clawed	25	13/04/2021	05/01/2022	Positive
