

## Follow-up report 16

06/08/2021

**The event is ongoing. Weekly follow-up reports will be submitted.**

Sender	Country/territory	Report ID
Delegate of United States of America	United States of America	FUR_150985
Event status	Self-declaration	
On-going	No	

### General information

Country or zone - Country	Disease - SARS-CoV-2 in animals (Inf. with)	Started on - 22/10/2020
Animal type - Terrestrial	Confirmed on - 13/04/2021	Causal agent - SARS-CoV-2
Disease category - Emerging	Reported on - 06/08/2021	Reason - Emerging disease

### Disease impact

Outbreak morbidity - 2.0	Outbreak mortality - 1.0
Zoonotic potential - Yes	Zoonotic potential description - Zoonotic potential under investigation

### Epidemiology

Source of the event or origin of the infection - Suspected human transmission

Epidemiological comments--5 Aug 2021 Update:

California (CA): A snow leopard at a zoo was confirmed positive for SARS-CoV-2 at the National Veterinary Services Laboratories based upon molecular testing (PCR and sequencing).

The affected animal exhibited clinical signs, including coughing, nasal discharge and inappetence. One additional snow leopard in the same enclosure as the affected animal and two Amur leopards from a nearby enclosure were also sampled. The Amur leopards have tested negative for SARS-CoV-2 and results are pending for the second snow leopard.

The habitats of the snow leopards and nearby Amur leopards were closed to the public after the affected animal's onset of clinical signs.

There is a single SARS-CoV-2 event occurrence in the United States of America, however, for WAHIS technical reasons, any new outbreaks in the country will be reported in this new event and not in the one first reported in April 2020.

For more details about SARS-CoV-2 testing of animals in the United States, see:

<https://www.aphis.usda.gov/aphis/dashboards/tableau/sars-dash-board>.

### Control measures at event level

#### Domestic control measures

- Applied
- Quarantine
  - Disinfection

#### Wild control measures

- Applied
- Quarantine
  - Disinfection

### Diagnostic

Clinical signs - Yes	Method of diagnostic - Diagnostic test
----------------------	--

### Quantitative data summary
