

Follow-up report 1

07/01/2021

The event is ongoing. Weekly follow-up reports will be submitted.

Sender	Country/territory	Report ID
Delegate of Brazil	Brazil	FUR_37468
Event status	Self-declaration	
On-going	No	

General information

Country or zone - Country	Disease - SARS-CoV-2 in animals (Inf. with)	Started on - 21/05/2020
Animal type - Terrestrial	Confirmed on - 16/10/2020	Causal agent - SARS-CoV-2
Disease category - Emerging	Reported on - 07/01/2021	Reason - Emerging disease

Disease impact

Outbreak morbidity - 1.0	Outbreak mortality - 0.0
Zoonotic potential - Yes	Zoonotic potential description - Currently unknown zoonotic potential

Epidemiology

Source of the event or origin of the infection - Probable contacto con caso humano

Epidemiological comments These tests are part of a research project on pets living in households with confirmed human cases of recent SARS CoV-2 infection. The SARS CoV-2 surveillance study (PetCOVID-19 Study) is carried out within the One Health framework and is coordinated by the Federal University of Paraná, with the participation of other federal universities and the cooperation with public health services in several States of the country.

Control measures at event level

Domestic control measures

Applied - Quarantine

Wild control measures

Applied - Quarantine

Diagnostic

Clinical signs - No

Method of diagnostic - Diagnostic test

Test name	Category	Test type	Laboratory	Species sampled	Outbreaks	Tested from	Tested until	Result
Real-time reverse transcription polymerase chain reaction (rRT-PCR)	Nucleic acid detection	Laboratory Test	Laboratorio de Bioquímica y Biología Molecular de la Universidad Federal de Paraná	Dogs		20/11/2020		Positive
Real-time reverse transcription polymerase chain	Nucleic acid detection	Laboratory Test	Laboratorio de Bioquímica y Biología Molecular de	Cats		11/12/2020		Positive

reaction (rRT-PCR)			la Universidad Federal de Paraná

Event morbidity - 1.0

Event mortality - 0.0

Outbreaks

1000138665-Cuiabá

Started on - 05/10/2020

First administrative division - Mato Grosso

Ended on - 16/10/2020

Second administrative division - Cuiaba

Epidemiological unit - Other

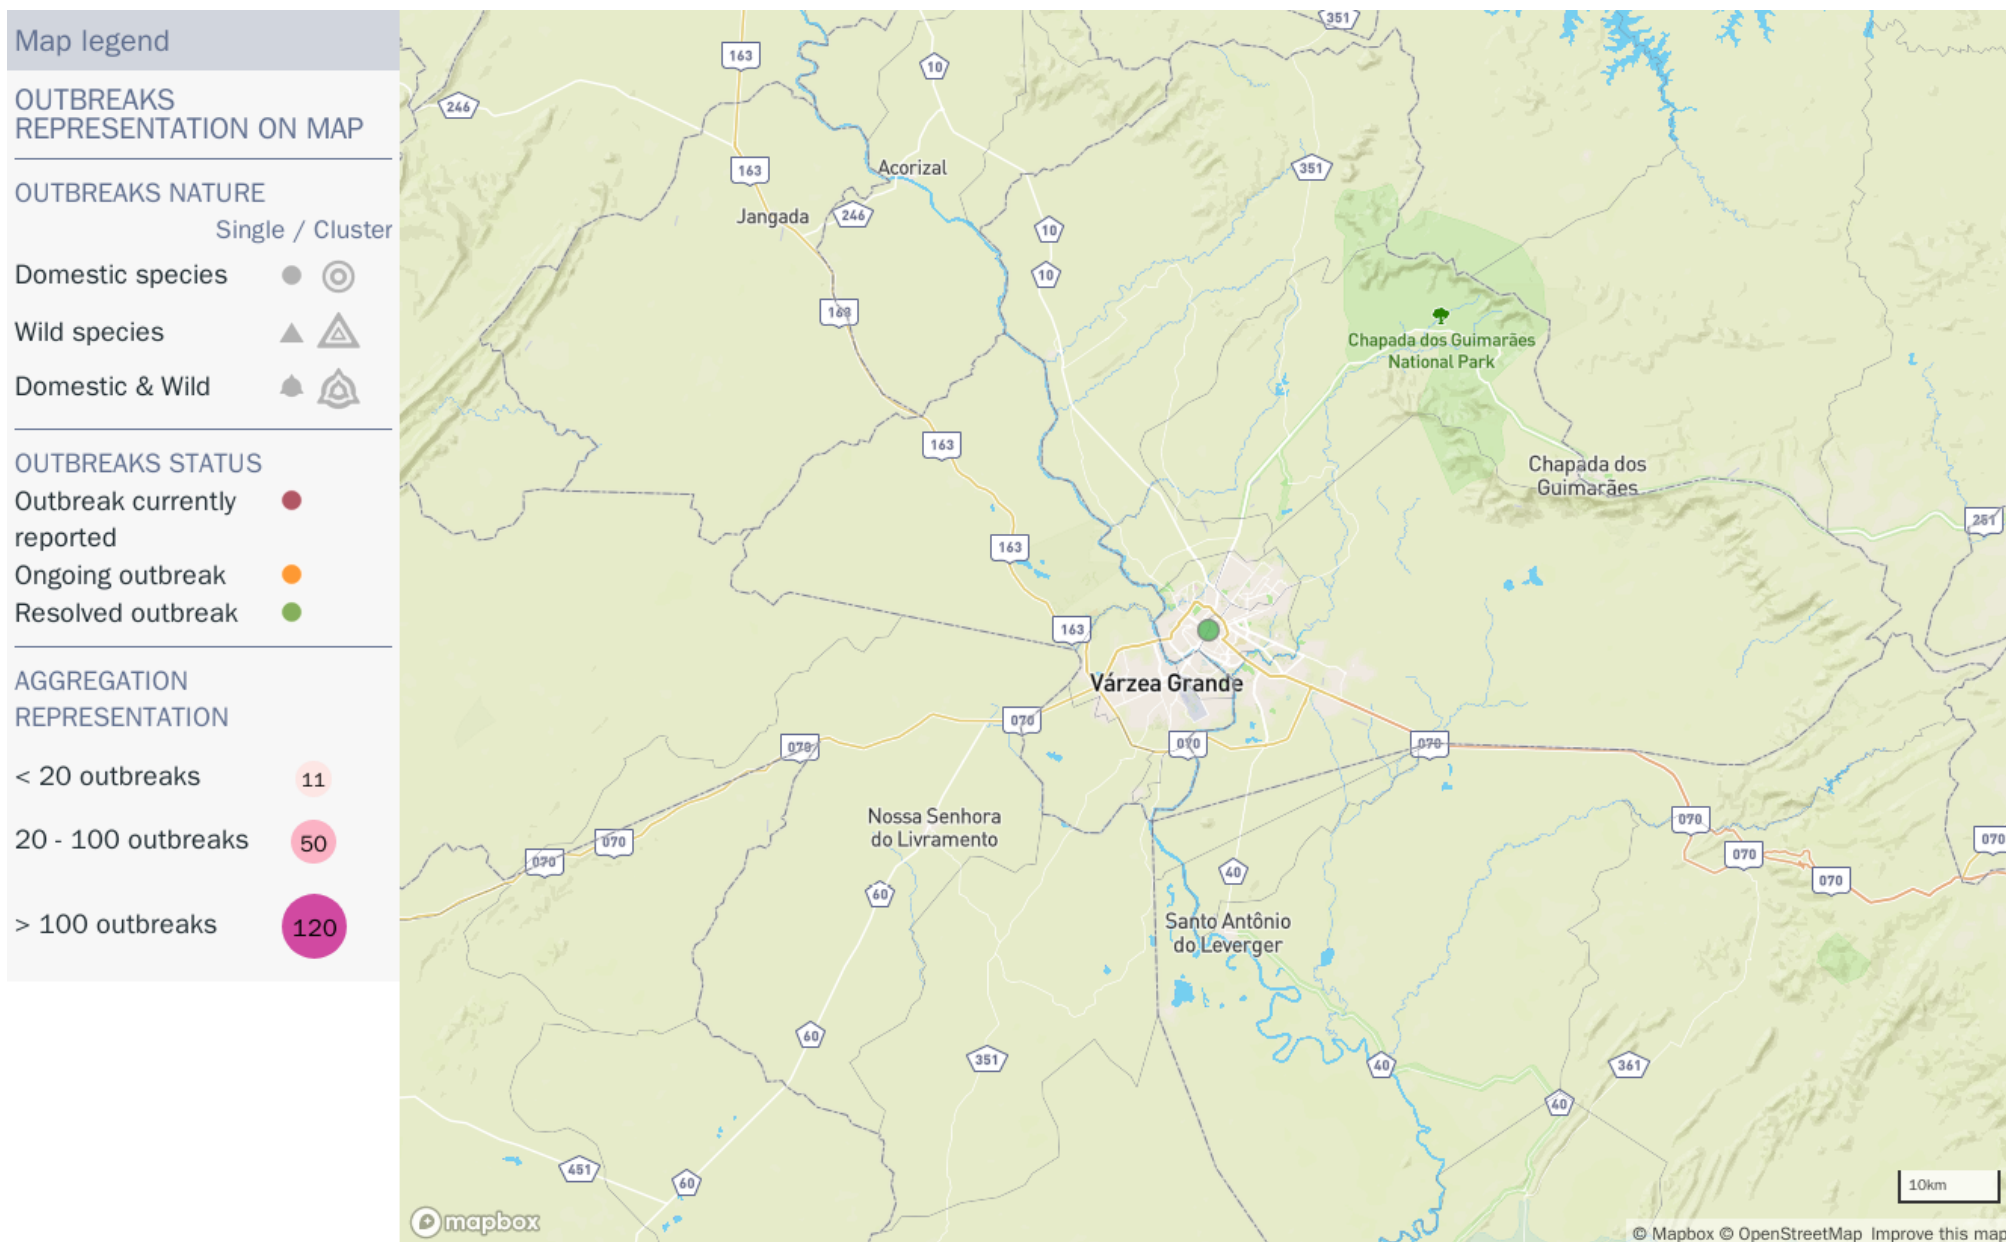

Geographic coordinates -
-15.5989,-56.0949

Third administrative division - Coxipo da
Ponte

Location - Cuiabá

Description of the affected population A female domestic cat (*Felis catus*), without clinical signs. Oral and nasal swabs were taken from a cat and a dog asymptomatic living in a household with COVID-19 confirmed human cases. The first sample from the cat, collected on 5 October 2020, was RT-PCR positive at the laboratories of the two universities (results received on 16 and on 22 October); the second sample, collected on 16 October 2020, was negative to the test carried out at the laboratory of the University of Mato Grosso (result received on 23 October 2020). The dog's samples were negative.
